

### Sweetwater's Simple Home

By: Lisa Burnett, Karla Eisenach & Susan Kendrick

A must have book, it is a wonderful book, especially if you love country accents!! The book goes through each room of the house with ideas for things to sew to give your home a very homey touch which double as organizing your home. All the projects use modern colors and fabrics that make fresh clean looks for the home. The projects make you think relax, I am home. The quilts in the book are very simply done, yet give a very dramatic and unique touch to your home. All the projects are simply done, with fabric being the center of attention. I love the use of the words and letters, especially the words such as Pure, Simple etc. I have three projects picked out and one I want to do for Christmas!! Must have this book for your library.
