

Simple 4 Patch

The great thing about this quilt, is you can use scraps or leftovers from other quilts.

I like to do 8" blocks, but you can do smaller or larger depending on how big your scraps are.

What you will need:

- (60) 4 1/2" blocks to make up your 4 patch blocks.
- (15) 8 1/2" blocks for your solid blocks. I like to pick something neutral.
- Batting. For this size, crib size works well (45" x 60")
- Border, if desired, I do 2 1/2" strips. (2) 52" strips, and (2) 40 1/2" strips.

Directions:

1. Take your 4 1/2" size blocks and piece them right sides together into any variety you like to create a 4 patch. Use 1/4" seam throughout the quilt.
2. When you have your 4 patches sewn together, start connecting 4 patch to solid block. (1/4" seam again!)
3. Continue to make rows, and then connect the rows to each other, to create 6 rows with 5 blocks in each row.
4. To add border, sew on the 40 1/2" (horizontal) borders first. Then add the vertical borders.
5. Your top is finished, go ahead and get your backing and batting, and quilt as desired.

Finished Size: 40" x 52"
